📁 INTERNSHIP

Company & Platform	:	Saisanj Retail Pvt Ltd (E-Commerce)
Used Technologies	:	PHP, AWS, Magento, API Development & Process Automation
Duration	:	May 2016 – August 2016

My Projects:-

i) **Product Price Match Automation:** Price match is a process of suggesting price for products in different marketplaces like amazon, flipkart, paytm and snapdeal by comparing our selling price with different sellers, and suggesting the product price by checking our feasibility and profitability.

ii) **Magento Soap API Development:** To write web service calls to get Product info, Managing Attributes and Attribute Sets, Inventory updates, Special price updates, Order management, Managing Sales, Update product info, etc., all types of E-Commerce actions by using Soap Calls in PHP.

EMPLOYMENT

Company & Platform	:	Saisanj Retail Pvt Ltd (E-Commerce)
Designation	:	Software Development Executive
Used Technologies	:	PHP, Python, AWS, Magento, API Development, Process Automation, Selenium Web Driver, NodeJS & AngularJS, Web Scraping
Duration	:	September 2016 – Till Date

My Responsibilities: To develop MarketFront.

MarketFront: Marketfront is a multi-channel E-Commerce retail seller's platform, which is integration of different marketplaces like Amazon, Flipkart, Paytm, Snapdeal etc., which provides services like Catalog, Order Management, Product Pricing, Inventory Management, Warehouse Management, Sales and Inventory, etc., and finally in one word, which provides single hand interface to Retail seller's to manage their products and data.

- i) **API Development:** To write backend service calls (API Development) by using Sequelize in NodeJS, it's an ORM for Node.js.
- ii) **Product Price Maintaining:** Price match is a process of suggesting price for products in different market places like amazon, flipkart and snapdeal by comparing our selling price with different sellers, and suggesting the product price by checking our feasibility. I did this process automation.
- iii) **Web Development:** Along with API development, I have done Web Development (UI Dev) of Marketfront using NodeJS and AngularJS (MVC Architecture).
- iv) **AWS Cloud Technologies Implementation:** AWS is a cloud platform, which provides all types of services like Computing & Hosting (EC2), Databases (RDS), storage (S3) and Workflows (SWF), Code management (CodeCommit), Domain Mapping (Route 53) etc., I have implemented these cloud services to develop web applications.
- v) **Data Scraping:** It's a process of getting particular information from particular source. I have good knowledge on web scraping, by using Selenium web-driver (chromedriver) in python.

COLLEGE PROJECTS

I. Create Game Logic

- Languages : Java and J-Option-Pane
- Description : It a Simple Cricket Game Logic to generate scores. And this game follows all batsmen properties.
